## **A/E 37T-35 COMMON RACK AND LAUNCHER TEST SET**

### **EXECUTIVE SUMMARY**

The A/E 37T-35 Common Rack and Launcher Test Set is a universal intermediate level test set that allows the technician to test, diagnose, troubleshoot, and perform operational and functional, check-out and acceptance of Navy and Marine Corps bomb racks and missile launchers. Currently, there are several different configurations of support equipment for testing 54 different bomb racks and missile launchers. The objective of the A/E 37T-35 program is to provide the Navy and Marine Corps with a standardized, common piece of support equipment for the testing and maintenance of bomb racks, missile launchers, and future weapons carriage devices. The A/E 37T-35 Common Rack and Launcher Test Set is in the Operations and Support phase of the Defense Acquisition System. The Initial Operational Capability was achieved in October 1999.

Operation of the A/E 37T-35 Common Rack and Launcher Test Set is performed by Navy personnel from the Aviation Ordnanceman rating with Navy Enlisted Classification (NEC) 6802 and Marine Corps Aviation Ordnance Equipment Repair Technician Personnel with Military Occupational Specialty (MOS) 6541. Maintenance of the A/E 37T-35 is performed by Navy Aviation Electronics Technician personnel with NEC 6673 and Marine Corps personnel with MOS 6492. Maintenance consists of on-line calibration and advanced maintenance. Depot level maintenance consists of rework and overhaul of the test set and repair of components determined to be beyond the intermediate level capability.

Initial training for A/E 37T-35 operation, maintenance, and calibration was provided by the contractor for test and evaluation personnel, Naval Air Maintenance Training Group Detachment (NAMTRAU) Maintenance Training Unit (MTU) instructors, depot support personnel, and fleet cadre personnel. All initial training has been completed.

A/E 37T-35 follow-on training is conducted at the following sites:

- MTU 4033 NAMTRAU North Island, California
- MTU 4032 NAMTRAU Norfolk, Virginia
- MTU 1011 NAMTRAU Jacksonville, Florida
- MTU 1012 NAMTRAU Whidbey Island, Washington
- Fixed Wing Medium Attack Training Squadron 203, Marine Corps Air Station Cherry Point, North Carolina
- Navy Technical Training Unit, Keesler Air Force Base, Biloxi, Mississippi

**A/E 37T-35 COMMON RACK AND LAUNCHER TEST SET**

**PREFACE**

This Approved Navy Training System Plan (NTSP) for the A/E 37T-35 Common Rack and Launcher Test Set was prepared by the Naval Air Systems Command (NAVAIR) within the guidelines set forth in the Navy Training Requirements Documentation Manual. This NTSP was developed to update the Draft NTSP N88-NTSP-A-50-9501/D dated January 1998. This NTSP reflects the availability of follow-on training for the A/E 37T-35 at Maintenance Training Unit (MTU) 4032; Naval Air Maintenance Training Unit (NAMTRAU) Norfolk, Virginia, and MTU 4033, NAMTRAU North Island, California, for Navy personnel in the Aviation Ordnanceman (AO) rating requiring Navy Enlisted Classifications (NECs) 6802. Follow-on training is no longer provided at MTU 4030, Naval Air Maintenance Training Group Detachment (NAMTRAGRU DET) Mayport, Florida.

## PART I - TECHNICAL PROGRAM DATA

### A. NOMENCLATURE-TITLE-PROGRAM

1. **Nomenclature-Title-Acronym.** A/E 37T-35 Common Rack and Launcher Test Set
2. **Program Element.** 64511N

### B. SECURITY CLASSIFICATION

1. **System Characteristics** ..... Unclassified
2. **Capabilities** ..... Unclassified
3. **Functions** ..... Unclassified

### C. MANPOWER, PERSONNEL, AND TRAINING PRINCIPALS

OPNAV Principal Official (OPO) Program Sponsor ..... CNO (N785)

OPO Resource Sponsor..... CNO (N785)

Developing Agency ..... NAVAIR (PMA260C11)

Training Agency ..... COMLANTFLT  
COMCPACFLT  
CNATT (FID N5)  
COMNAVAIRESFOR  
CMC  
MCCDC

Training Support Agency..... NAVAIR (PMA205)

Manpower and Personnel Mission Sponsor..... CNO (N12)

Director of Naval Education and Training ..... CNO (N00T)

Chief of Naval Personnel..... NAVMILPERSCOM (NMPC-4, NMPC-40)

Commander, Reserve Program Manager..... COMNAVAIRESFOR (N3W)

Marine Corps Force Structure..... MCCDC (C53)

## **D. SYSTEM DESCRIPTION**

**1. Operational Uses.** The A/E 37T-35 Common Rack and Launcher Test Set, hereafter referred to as A/E 37T-35, is a universal test set designed to be used to test various Navy and Marine Corps bomb racks, missile launchers, and other weapon stores assemblies which have been removed from the aircraft. Currently, there are several different configurations of Support Equipment (SE) for the testing of 54 configurations of bomb racks and missile launchers. Useful service life of the current SE is rapidly approaching its end and supportability is no longer cost effective. The A/E 37T-35 is assigned to Navy Aircraft Intermediate Maintenance Departments (AIMDs) and Marine Aviation Logistics Squadrons (MALS) ashore and afloat.

**2. Foreign Military Sales.** Foreign Military Sales (FMS) are planned for Australia, Finland, Canada, Taiwan, Kuwait, Malaysia, and Italy.

**E. DEVELOPMENTAL TEST AND OPERATIONAL TEST.** Due to the excessive scope and capability of the A/E 37T-35, Developmental Test (DT) and Operational Test (OT) were conducted in three phases. Phase I, Initial Testing and field visits to AIMDs and various carriers, indicated the A/E 37T-35 met or exceeded all operational characteristics set forth in the contract (N00163-93-C-0231) and was completed in June 1995. Phase II DT and OT was conducted by the Naval Air Warfare Center Aircraft Division (NAWCAD), Patuxent River, Maryland, and was completed 15 March 1996. Phase III DT and OT was completed July 1996.

**F. AIRCRAFT AND/OR EQUIPMENT/SYSTEM/SUBSYSTEM REPLACED.** When fully fielded, the following SE is being replaced by the A/E 37T-35 as they become obsolete or no longer cost effective to support:

A/E 24T-121 .....	Air Launched Weapons Rail Test Set
A/E 24T-161 .....	Weapons Rack Test Set
A/E 24T-172 .....	Air Launched Weapons Rail Test Set
A/E 37T-19 .....	Bomb Rack Test Set
AN/AWM-90 .....	Weapons Launcher Test Set
AN/AWM-94 .....	Bomb Rack Test Set
TTK-281E .....	Firing Circuit Test Set
TTK-242B/C/D .....	Firing Circuit Test Set
LAU-92 SPSU .....	Air Launched Weapons Test Set

## **G. DESCRIPTION OF NEW DEVELOPMENT**

**1. Functional Description.** The A/E 37T-35 is a universal intermediate test set that allows the maintenance technician to test, diagnose, troubleshoot, and perform operational and functional check-out and fault isolation to a defective Shop Replaceable Assembly (SRA) for various bomb racks and missile launchers. Once the A/E 37T-35 has been connected to the Unit Under Test (UUT), a Test Data File is executed by the onboard Central Processing Unit (CPU).

The CPU exercises the different UUT functions, evaluates the status of the UUT, and gives the operator a GO/NO-GO indication. The solid-state electronics in the A/E 37T-35 provide for modular construction, increased reliability, and automatic or semi-automatic UUT testing capability. In most cases, no operator intervention is required once the test has been initiated.

**2. Physical Description.** As a system, the A/E 37T-35 consists of an electronics case and accessory cases. The electronics case measures approximately 34 inches long, 16 inches wide, 18.5 inches deep, and weighs approximately 135 pounds. This weight dictates a two-person carry. Each accessory case weight falls within 25.5 to 60 pounds, and measures approximately 33 inches long, 21 inches wide, and 13.5 inches high.

**3. New Development Introduction.** The A/E 37T-35 was introduced into the fleet as a new production test set.

**4. Significant Interfaces.** In that the A/E 37T-35 can test a vast variety of racks, launchers, and pylons, there are various test adapters for the dozens of different UUT tests and 14 sub-tests. Each test adapter has a unique electrical interface for each UUT. The test adapters each have an individual Support Equipment Requirements Documentation (SERD). The test adapters vary in weight from one to 15 pounds. The test adapters are stored in the adapter accessory cases. The number of cases is dependent on the number of adapters required at a particular site. Information on the 83 different adapters and their 61 interfacing UUTs can be located in the User Logistics Support Summary (ULSS), A/E 37T-35-ULSS Revision A, dated 15 February 1998.

**5. New Features, Configurations, or Material.** Not Applicable (NA)

## **H. CONCEPTS**

**1. Operational Concept.** The A/E 37T-35 is operated in intermediate maintenance level Work Center 710 by Navy AO personnel with NEC 6802 and by United States Marine Corps (USMC) personnel with Military Occupational Specialty (MOS) 6541, Aviation Ordnance Equipment Repair Technician.

### **2. Maintenance Concept**

**a. Organizational.** NA

**b. Intermediate.** The A/E 37T-35 is maintained at the intermediate maintenance level in Work Center 710 by Navy AO personnel with NEC 6802 and by United States Marine Corps (USMC) personnel with Military Occupational Specialty (MOS) 6541, Aviation Ordnance Equipment Repair Technician. Navy Aviation Electronics Technicians (ATs) with NEC 6673 in Work Center 670 perform on-equipment repair and calibration of the A/E 37T-35. Marine Corps test set maintenance and repair is, performed by Advanced Calibration Technicians with MOS 6492.

**c. Depot.** As of this date, contractor depot maintenance capability has not been established for the A/E 37T-35. If deemed cost effective, a depot facility will be established for repair of selected circuit cards and/or sub-assemblies in the A/E 37T-35.

**d. Interim Maintenance.** The contractor provided interim support of the A/E 37T-35 until the Material Support Date of August 2001.

**e. Life Cycle Maintenance Plan.** The A/E 37T-35 is scheduled to follow an annual calibration cycle.

**3. Manning Concept.** The A/E 37T-35 has no impact on existing manpower requirements at organizational, intermediate, or depot level maintenance activities. Enlisted manning for intermediate maintenance activities is based on the total overall assigned workload. Skills required to support the A/E 37T-35 are considered to be within the capability of existing NECs and MOSs. Refer to Part II for existing intermediate manpower requirements.

**4. Training Concept.** The training concept for the A/E 37T-35 is for intermediate level personnel to receive training through *D/E-646-7001, Strike Armament Systems Intermediate Maintenance*, for NEC 6802, and *M-646-7026, Aviation Ordnance Technician, Intermediate Maintenance*, for MOS 6541.

NEC 6802 can be attained by, attending D/E-646-7001 at MTU 4032 NAMTRAU Norfolk or MTU 4033 NAMTRAU North Island

MOS 6541 can be attained by, attending M-646-7026 at Naval Air Maintenance Training Marine Unit (NAMTRA MARUNIT) Marine Corps Air Station (MCAS) Cherry Point.

MOS 6492 can be attained by, attending *C-198-2011, Aviation Basic Calibration Technician Pipeline*, at Navy Technical Training Unit (NTTU), Keesler Air Force Base (AFB) Biloxi Mississippi.

Selected Reserve personnel may earn intermediate level maintenance NECs by attending formal training at NAMTRAUs providing a quota and funding are available, and the student is available to attend the training. Specific guidelines are contained in NAVPERS 18068F Volume II, Chapter IV Navy Enlisted Classifications.

The established training concept for most aviation maintenance training divides “A” School courses into two or more segments called *Core* and *Strand*. Many, organizational level “C” School courses are also divided into separate *Initial* and *Career* training courses. “A” School *Core* courses include general knowledge and skills training for the particular rating, while “A” School *Strand* courses focus on the more specialized training requirements for that rating and a specific aircraft or equipment, based on the student’s fleet activity destination. *Strand* training immediately follows *Core* training and is part of the “A” School. Upon completion of *Core* and *Strand* “A” Schools, graduates going to organizational level activities attend the appropriate *Initial* “C” School for additional specific training. *Initial* “C” School training is intended for students in paygrades E-4 and below. *Career* “C” School training is

provided to organizational level personnel, E-5 and above, to enhance skills and knowledge within their field. “A” School graduates going to intermediate level activities attend the appropriate intermediate level “C” School. Intermediate level “C” Schools are not separated into *Initial* and *Career* courses. Marine Corps graduates of *Core* and *Strand* “A” school attend the appropriate *Career* “C” School for additional training on a specific type of aircraft or equipment, and to enhance skills and knowledge within their field. Graduates from “C” School receive their primary MOS.

**a. Initial Training.** The Metric Systems Corporation has conducted two 40-hour cadre training sessions for the purpose of developing instructor’s understanding of the A/E 37T-35. These sessions were held at NAMTRA MARUNIT MCAS Cherry Point and MTU 4033 NAMTRAU North Island.

NAMTRAU (Code 2412) conducted eight Fleet Introduction Assistance Team (FIAT) training sessions. These sessions were two days in length and conducted by two NAMTRAU instructors at the following locations:

- AIMD, Naval Air Station (NAS) Oceana, Virginia
- AIMD, NAS Lemoore, California
- AIMD, NAS North Island, California
- AIMD, NAS Whidbey Island, Washington
- AIMD, NAS Jacksonville, Florida
- AIMD, NAS Brunswick, Maine
- MALS, MCAS Cherry Point, North Carolina
- MALS, MCAS Miramar, California

**b. Follow-on Training.** The A/E 37T-35 causes no change in student throughput or chargeable student billets. Follow-on training courses were modified to include the A/E 37T-35 and are provided by MTU 4032 NAMTRAU Norfolk and MTU 4033 NAMTRAU North Island for Navy AOs requiring NECs 6802. For USMC Aviation Ordnance personnel requiring MOS 6541, follow-on training is provided by NAMTRA MARUNIT Cherry Point. For USN personnel requiring NEC 6673 and 6718 and USMC personnel requiring MOS 6492, follow-on training is provided by, NTTU Keesler AFB. These personnel will maintain, calibrate, and repair the A/E 37T-35.

**(1) Operator Training.** NA

**(2) Maintenance Training**

**(a) Organizational.** NA

**(b) Intermediate.** Intermediate maintenance training is available for AO and Aviation Electronics Technician (AT) personnel at the appropriate MTU. For detailed information refer to element III.A.2.a. The A/E 37T-35 information, has been incorporated into the training tracks listed below.

**Title .....** **Strike Armament Systems Intermediate Maintenance**

**CIN .....** D/E-646-7001

**Model Manager ...** MTU 4033 NAMTRAU North Island

**Description .....** This track provides training to the Aviation Ordnanceman, including:

- ° Visual Identification of Aircraft Armament Equipment
- ° Operation of Armament Equipment
- ° Troubleshooting Aircraft Armament Equipment
- ° Test and Repair of Aircraft Armament Equipment
- ° Publications

Upon completion the student will be able to perform as an Intermediate Level Armament Maintenance Technician under direct supervision.

**Location .....** ° MTU 4033 NAMTRAU North Island  
° MTU 4032 NAMTRAU Norfolk

**Length .....** 65 days

**RFT date .....** Currently available

**Skill identifier .....** AO 6802

**TTE/TD .....** See element IV.A.1. for TTE. TD is NA

**Prerequisites .....** C-646-2012, Aviation Ordnanceman Airwing Strand Class A1

**Title .....** **Aviation Ordnance Technician, Intermediate Maintenance**

**CIN .....** Track M-646-7026 (Course C-646-3105)

**Model Manager ...** NAMTRA MARUNIT Cherry Point

**Description .....** This track provides training to the Marine Aviation Ordnanceman, including:

- ° Visual Identification of Aircraft Armament Equipment
- ° Operation of Armament Equipment
- ° Troubleshooting Aircraft Armament Equipment
- ° Test and Repair of Aircraft Armament Equipment
- ° Publications

Upon completion the student will be able to perform as an Intermediate Level Armament Maintenance Technician under direct supervision.

Location ..... VMAT-203 MARUNIT, MCAS Cherry Point  
 Length ..... 87 days  
 RFT date ..... Currently available  
 Skill identifier ..... MOS 6541  
 TTE/TD ..... See Part IV  
 Prerequisites ..... C-646-2011, Aviation Ordnanceman Class A1  
                               C-646-2012, Aviation Ordnanceman Airwing Strand Class  
                               A1

**Title ..... Aviation Basic Calibration Technician Pipeline**  
 CIN ..... C-198-2012  
 Model Manager ... NTTU Keesler AFB  
 Description ..... This course provides training to the USN or USMC Aviation  
                               Electronics Technician, including:  
                               ° Operation of Equipment  
                               ° Calibration Procedures  
                               ° Analysis Techniques  
                               ° Publications  
                               ° Troubleshoot and Repair General Purpose Electronic Test  
                                   Equipment (GPETE), as well as Physical and Dimensional  
                                   Test and Measuring Systems.  
                               Upon completion, the technician will be able to perform as  
                               an Aviation Basic Calibration Technician in a shop  
                               environment under direct supervision.  
 Location ..... NTTU Keesler AFB  
 Length ..... 131 days  
 RFT date ..... Currently available  
 Skill identifier ..... ° AT 6673  
                               ° MOS 6492  
 TTE/TD ..... See element IV.A1. for TTE. TD is NA.  
 Prerequisites ..... C-100-2017, Avionics Technician I Level Class A1

**Title .....** **Advanced Calibration Technician**  
**CIN .....** C-198-2011  
**Model Manager ...** NTTU Keesler AFB  
**Description .....** This course provides advanced training to the USN or USMC Aviation Electronics Technicians, including:  
     ° Electronic Calibration Theory  
     ° Application  
     ° Publications  
     ° Operation of Equipment  
 Upon completion, the technician will be able to perform as an Advanced Aviation Calibration Technician in a shop environment under limited supervision.  
**Location .....** NTTU Keesler AFB  
**Length .....** 81 days  
**RFT date .....** Currently available  
**Skill identifier**     ° AT 6718  
                           ° MOS 6492  
**TTE/TD .....** See element IV.A.1 for TTE. TD is NA.  
**Prerequisites .....** C-198-2012, Aviation basic Calibration Technician

### c. Student Profiles

<b>SKILL IDENTIFIER</b>	<b>PREREQUISITE SKILL AND KNOWLEDGE REQUIREMENTS</b>
AO 6802	° C-646-2011, Aviation Ordnanceman Class A1 ° C-646-2012, Aviation Ordnanceman Airwing Strand Class A1
AT 6673	° C-100-2020, Avionics Common Core Class A1 ° C-100-2017, Avionics Technician I Level Class A1 ° C-198-2012, Aviation Basic Calibration Technician
MOS 6541	° C-646-2011, Aviation Ordnanceman Class A1 ° C-646-2012, Aviation Ordnanceman Airwing Strand Class A1
MOS 6492	° C-100-2020, Avionics Common Core Class A1 ° C-100-2017, Avionics Technician I Level Class A1 ° C-198-2012, Aviation Basic Calibration Technician

**d. Training Pipelines.** There are no new training tracks required by this NTSP. The following training tracks apply and are available in the OATMS:

TRACK NUMBER	TRACK TITLE
M-646-7026	Aircraft Ordnance Technician, IMA
D/E-646-7001	Strike Armament System Intermediate Maintenance

## **I. ONBOARD (IN-SERVICE) TRAINING**

**1. Proficiency or Other Training Organic to the New Development.** Onboard proficiency training will be conducted to improve and enhance the capabilities of individuals.

**a. Maintenance Training Improvement Program.** Current planning is to adopt the Aviation Maintenance Training Continuum System (AMTCS) concepts to replace Maintenance Training Improvement Program (MTIP).

**b. Aviation Maintenance Training Continuum System.** AMTCS will provide career path training to the Sailor or Marine from their initial service entry to the end of their military career. AMTCS concepts provides an integrated system that will satisfy the training and administrative requirements of both the individual and the organization. The benefits will be manifested in the increased effectiveness of the technicians and the increased efficiencies of the management of the training business process. Where appropriate, capitalizing on technological advances and integrating systems and processes can provide the right amount of training at the right time, thus meeting the CNO's mandated "just-in-time" training approach.

Technology investments enable the development of several state-of-the-art training and administrative tools: Interactive Multimedia Instruction (IMI) for the technicians in the Fleet in the form of Interactive Courseware (ICW) with Computer Managed Instruction (CMI) and Computer Aided Instruction (CAI) for the schoolhouse.

Included in the AMTCS development effort is the Aviation Maintenance Training Continuum System - Software Module, which provides testing [Test and Evaluation], recording [Electronic Certification Qualification Records], and a Feedback system. The core functionality of these AMTCS tools are based and designed around the actual maintenance-related tasks the technicians perform, and the tasks are stored and maintained in a Master Task List data bank. These tools are procured and fielded with appropriate Commercial-Off-The-Shelf (COTS) hardware and software, i.e., Fleet Training Devices - Laptops, PCs, Electronic Classrooms, Learning Resource Centers (LRC), operating software, and network software and hardware.

Upon receipt of direction from OPNAV (N789H), AMTCS concepts are to be implemented and the new tools integrated into the daily training environment of all participating

aviation activities and supporting elements. AMTCS will serve as the standard training system for aviation maintenance training within the Navy and Marine Corps, and is planned to supersede the existing MTIP and Maintenance Training Management and Evaluation Program (MATMEP) programs.

## **2. Personnel Qualification Standards. NA**

**3. Other Onboard or In-Service Training Packages.** Marine Corps onboard training is based on the current series of MCO P4790.12, Individual Training Standards System and MATMEP. This program is designed to meet Marine Corps, as well as Navy OPNAVINST 4790.2 series maintenance training requirements. It is a performance-based, standardized, level-progressive, documentable, training management and evaluation program. It identifies and prioritizes task inventories by MOS through a front-end analysis process that identifies task, skill, and knowledge requirements of each MOS. MTIP questions coupled to MATMEP tasks will help identify training deficiencies that can be addressed with remedial training. (MATMEP, is currently planned to be replaced by AMTCS.

## **J. LOGISTICS SUPPORT**

### **1. Manufacturer and Contract Numbers**

<b>CONTRACT NUMBER</b>	<b>MANUFACTURER</b>	<b>ADDRESS</b>
N00163-93-C-0231	Metric Systems Corp.	651 Anchors Street Northwest Fort Walton Beach, FL 32548

**2. Program Documentation.** Users Logistics Support Summary (ULSS) Common Rack and Launcher Test Set, A/E 37T-35, of 15 February 1998, Revision A, is current.

**3. Technical Data Plan.** Metric Systems Corp. has prepared the source data for the A/E 37T-35. Technical manuals were developed per Technical Manual Contract Requirement (TMCR) 33-92, dated 20 August 1991. Operational procedures are contained in NAVAIR 16-30AE37T-35-1.

**4. Test Sets, Tools, and Test Equipment.** No special test sets, special tools, or test equipment are required.

**5. Repair Parts.** Interim, spares and repair parts were provide, by the contractor, prior to the Material Support Date. Once the Material Support Date (MSD) of August 2001 was reached, the Navy Inventory Control Point (NAVICP) Mechanicsburg, Pennsylvania, has maintained stock levels at Navy Supply Centers and fleet In Service Engineering Agents. Fleet users requisition these items from the NAVICP via Military Standard Requisition and Issue Procedures.

**6. Human Systems Integration.** CRALTS is a mature program. All new design systems and software should address the human-machine interface for operators, maintainers, and support personnel. The design processes should conform to best standard human engineering practices as defined in existing human factors engineering design standards. This system has no habitability impact. Manpower issues are covered in part II and III of this document. Maintenance training includes a blend of ICW and paper based instruction. Any future development of CBT, CAI and ICW training material will be sharable content object reference model conformant and comply with the technical standards to run in the intended environment: classroom automated electronic classroom or learning resource center, Navy e-learning, AMTCS, or desktop (NMCI ashore or IT21 afloat). A training effectiveness evaluation has not been performed but the courses have undergone a yearly formal course evaluation since inception. The results from these formal course reviews are used to effect curriculum changes to meet the fleet's needs. A formal training effectiveness evaluation action chit has been documented in Part VI of this NTSP listing the Assistant Program Manager Training System, NAVAIR PMA205 as the action command. In its current state of design, CRALTS contains no explosive, radioactive, or carcinogenic materials. Toxic materials are present in small amounts and in forms that present no hazard during any phase of system ownership, including disposal. If the components were to be incinerated, limited amounts of corrosive vapors would be generated by the decomposition of wire insulation. This is common to all electronic equipment meeting the requirements to operate in the specified environments. Environmental and Occupational Safety and Health requirements meet federal, state, and local standards, regulations, and directives and are enforced by respective agencies, as applicable.

## K. SCHEDULES

**1. Schedule of Events.** Initial production quantities of the A/E 37T-35 and its associated adapters began in September 1996. The delivery of systems, at eight per month, began in October 1999. The total Navy and Marine Corps inventory was at 265 test sets when production ended in FY00.

**a. Installation and Delivery Schedules.** This document reflects the original delivery schedule and will be updated when information becomes available. Delays have no impact on the, total amount of test sets scheduled to be received.

ACTIVITY	UIC	DELIVERY DATE	TEST SET QUANTITY
NAS Jacksonville	66051A	Sept-Nov 1997	3
CV 62 USS Independence	03362	Sept-Nov 1997	2
MCAS Cherry Point	66047C	Sept-Nov 1997	6

<b>ACTIVITY</b>	<b>UIC</b>	<b>DELIVERY DATE</b>	<b>TEST SET QUANTITY</b>
